Summary

Frontend Engineer with 4+ years of experience building **data-driven, user-focused applications** using React, TypeScript, and modern UI frameworks.
Specialized in developing **complex interfaces, dashboards, and scalable UI systems** that translate backend logic and data into clear, intuitive user experiences.
Strong focus on **performance, maintainability, and UX clarity**. Comfortable working with **APIs, real-time data, and cross-functional teams** in fast-paced environments with high ownership.

Tech Stack

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), ShadCN/UI, TailwindCSS
State Management: Redux Toolkit, React Query
Data & APIs: REST, GraphQL
Testing: Jest, React Testing Library, Cypress
Tools & Platforms: Firebase, CMS (Pimcore), Git
Workflow: AI-assisted development (Cursor, Claude Code, Codex)

Experience

Frontend engineer
Cloud Automate
04/2022 - Present | Switzerland, Zurich (Remote)

- Developed and maintained React / Next.js features across multiple client platforms
- Built reusable UI components and patterns, improving development efficiency and consistency across the application
- Implemented structured multi-step forms and data-driven interfaces based on business requirements
- Collaborated closely with backend and product teams to deliver features in short development cycles
- Improved code quality and release stability by introducing better validation and testing practices
- Contributed to performance improvements through code splitting and optimized rendering

React | TypeScript | Next.js | Tailwind | Redux | Testing

Frontend developer
Proceq/Screening Eagle
11/2022 - 06/2025 | Switzerland, Zurich

- Led frontend development of a Partner Portal (React, Tailwind), owning the full lifecycle from concept to production
- Built and optimized complex UI components for product catalog, internal tools, and CMS-driven platforms
- Improved performance and responsiveness across devices, enhancing overall user experience
- Refactored legacy codebases, increasing maintainability and reducing technical debt
- Delivered features and bug fixes in a fast-paced, production-critical environment

React | TypeScript | JavaScript | REST/GraphQL APIs | CMS | Bootstrap

Software Engineer
Financial Services Platform (NDA)
10/2021 – 10/2022 | Lviv, Ukraine

- Built UI components for an internal financial dashboard used by non-technical users
- Worked with complex data structures and improved data visualization clarity
- Integrated REST APIs and ensured reliable data flow across the application
- Refactored legacy UI to improve maintainability and consistency
- Collaborated with developers and business stakeholders to deliver data-driven features

React | TypeScript | JavaScript | REST API | UI Components | Data Visualization

CFO
Blackthorn Vision
09/2015 – 09/2021 | Lviv, Ukraine

- Built and led a finance team, implemented efficient processes, and successfully passed annual audits.
- Developed problem-solving, leadership, and cross-department collaboration skills that now strengthen project delivery in tech.

AP accountant
Nestle Business Services Europe
08/2012 – 08/2015 | Lviv, Ukraine

- Strengthened teamwork and communication skills across international departments.
- Contributed to process improvements and daily operational reviews.

Selected projects

WaterLab Demo – Data Visualization Platform
React, TypeScript, Leaflet, APIs

- Built a data-driven application visualizing environmental datasets from public APIs (Socrata, CSV fallback)
- Implemented interactive geospatial maps and time-series UI components
- Designed API integration and caching strategies for performance and reliability
- Focused on transforming complex data into clear, actionable user insights
